

Figuring out what you want to do in life is something that can either take years to figure out after you graduate high school (or college) OR you can be intentional and figure it out before you graduate high school. By figuring it out now you can start now to learn the needed skills and choose the best high school, PSEO and college classes before you waste time with classes that don't prepare you for that career. But FIRST you need to figure out exactly WHAT it is that God has uniquely prepared you to do.

In this course we will put together your interests, your personality, and the skills you have already learned to help you determine what might be a good career for you. You'll get the opportunity to meet leaders in fields that match your interests and skills and build an education plan to help you prepare for that career.

## **Prerequisite**

- Tech Workshop (August)  
or
- Tech Readiness (Fall Semester) (strongly encouraged) (Can be concurrently registered)

*When you are done you will have the option to have a private consult (for a small additional fee) to help you create a course plan for the rest of your high school course work and also start to look at potential education beyond high school (college, trade school, other education opportunities, and potential internships).*

## **About the Instructor**

Mr. Paschen has worked with high school students preparing for both college and career for over 15 years. He has over 30 years experience running his own business as well as many roles in many different industries. He enjoys helping students determine what is the best career match for them and helping them pursue means of learning the necessary skills for that career.
