

Your children need to learn how to use technology effectively. Helping them learn something that you don't know is difficult or impossible but almost always frustrating.

This course will help take the frustration away from the 'tech stuff' in your home school.

Over the course of 4 weeks we will go through the skills you need to know to:

- Keep your children safe online
- Keep yourself (and your data) secure online
- Help your students when they have tech challenges
- Use technology (devices and software/apps) to make your home school more organized and efficient
- Identify if your students have the abilities to get a career in technology
- Locate more ways to learn about technology - for you and your children

This course meets in-person for 4 weeks (January 24 - Feb 14; or Mar 20 - Apr 10).

Register for this course and come to the sessions that work for your schedule.

-

Skills Required

- **Basic Computer Skills** - Basic computer usage and familiarity

Equipment Required

- **A Current laptop** - (recommended) A current laptop (within the last 4 years) with Windows, Mac or Linux is required during class.

Homework

Students should expect to spend 1 hour per week on homework.

If you would like to register for this class, you will need to login and add yourself as an additional child under the profile tab at the top of the page. Choose adult as your grade. Make sure you close out that page by clicking the "update" box at the bottom of the page. Then you will see yourself as a potential student when registering for this class.

About the Instructor

Mr. Paschen has been teaching technology courses for over 20 years, including both high school and college students in public and private/home-school. He also teaches several other technology courses at Mid Metro Academy throughout the year.
